A. T. Whitt Gets Control Of Winchester Bank

A. T. Whitt, President of the Clay City National Bank, we have just learned, has purchased the late Holly Witherspoon's interest in the Winchester Bank which gives him control of this institution. Mr. Whitt is an unexcelled banker, having made a success of his venture in Clay City during the past eighteen years, fifteen years of which time he was cashier and is now its president.

Mr. Whitt will assume the presidency of the Winchester Bank assuring the same connection that Mr. Witherspoon held from the time the bank was organized years ago. We wish to assure the Clark county people, our neighbors and friends, that Mr. Whitt is fully capable of caring for the management of the Winchester bank in the same efficient way that Mr. Witherspoon guided it, and in the same capable way that he has steered the Clay City National.

Mr. Whitt will remain as president of the the Clay City National Bank and continue to give its business affairs his personal attention. Mr. Whitt will probably dispose of some of the stock to a few of his friends.

We learn Mr. Whitt, in addition to the present board of directors of this bank, will have associated with him some Powell county men who have moved to Clark county in recent years.

Work to Begin on Road Monday

The editor of the Times went to Irvine Saturday to lend encouragement to the building of the two miles of road beginning at the Estill county line three miles south of Clay City and going toward Irvine. The Fiscal Court was called to consider this proposition and voted unanimously to construct the road.

This shows how bad Estill wants to get connection with Powell. True enough this two miles of road is much worse than any where else on the road to Irvine in Estill county.

Work will begin on this road next Monday and will be continued until the full two miles is completed.

School Report

Prof. F. P. Tracy, superintendent of the Waltersville consolidated school and his valued assistant Miss Etta Bowman have a most enviable record for deportment of pupils attending the first week. Seventy-three enrolled made 100 per cent according to report as seen by the editor. Regret that lack of space prevents our publishing the name of each pupil so earning this distinction.

To Stay a Month With Us

J. H. O'Rear and family have come from Winchester to their old home in Clay City to stay one month and kinder renew their close old-time connection with us folks. We are indeed glad to have them with us if but for one month in the year.

Educational Facts on Shale

(Continued from last week.)

We are interested now in the Volatile matter and loss on Distillation previously mentioned, for while the Potash is an original element in itself, and remains so the entire crude Oil and Ammonia are formed from combinations of the vapors and gases which are driven off from the dead animal matter in this Devonian "mud".

Not being ready at this point to take up the treatment of the Shale—let us just consider the products obtained by that treatment.

The Colorado school of Mines at Golden, Colorado, with its splendid faculty of engineers and chemists has done a great deal of authoritative and beneficial work on the Shale problem.

Dr. Victor C. Alderson is President of this school and made a special trip to Scotland last summer to investigate the Shales of the British Isles. Dr. Alderson is probably the foremost individual Shale authority in America and has used to the greatest advantage his own wonderful scientific ability in connection with the tremendous prestige and research facilities which accompany his position in the mineral world.

The following is an extract from a recent article of his on the Shales of Kentucky—in connection with the use of the proven Scotch method of retorting and treating the Shale:—

"The Scotch retort is a vertical, two chambered retort in which Oil is produced in the upper and Ammonia in the lower chamber. The only known American deposit to which it is adapted is the Oil Shale deposit at Clay City, Kentucky.

This black Devonian shale in Kentucky more nearly resembles the Scotch shale than any other deposit now known in the United States. The process for its treatment as worked out at the Detroit Testing Laboratories for the Devon Oil Shale Products Company consists of a modified Scotch process. An analysis of this Shale gave 22.7 gallons of Oil, 4,167 cubic feet of non-condensable gas, 97.8 pounds of Ammonium Sulphate and 58.8 pounds of Potash per ton.

These figures are from a thoroughly reliable and a completely disinterested source and they will probably be exceeded when the plants are in full and smooth operation.

The cost of handling shale in a plant of 1500 tons daily capacity is a maximum of \$1.04 per ton. This figure will also be greatly reduced in the finished plant.

With these facts before us, it becomes easy to see what the Shale can mean to this community. Every one acquainted in the vicinity knows it to be practically inexhaustible and also knows the demand that exists for the Oil and the fertilizers. Really the Shale enterprise of the Kentucky fields is more of fertilizer than an Oil business, and knowing the products educed from a ton of Shale and the cost

NOTICE!

Stanton, Ky., Aug. 2nd, 1921.

To the Voters of Powell County:

I feel it a duty to myself to deny in public the many false reports that are being circulated about me, for the sole purpose of damaging me in my race for Sheriff. While I think that the people know me too well to believe them, I want to make the following statement. I will give \$100.00 for the proper proof where I have been drunk or that I have bought any whiskey in the last eight years, which is contrary to reports.

And as Deputy Sheriff for two years I have failed to pass up any man that I had papers for, and in my own behalf I want to say up to July 23rd, 1921, there was not a warrant for a man in Powell county but what had been executed. Now don't vote against me for doing my duty. Don't be misled by eleventh hour false reports. Don't swap hosses in the middle of a stream.

Now voters go to the polls August 6th and vote for the man you think will give the public the best service, and your verdict I will abide by. I am,

Yours very truly,
F. C. WILLS.

Enters Business

Mr. J. J. Curry has opened a grocery and soft drink stand in the old barber shop property adjoining the Red River Hotel. This property has recently been repaired, repainted, a new porch put in front and otherwise put in first-class presentable appearance. Mr. Curry will give the business his personal attention. We bespeak success for Mr. Curry in his new business venture.

Bro. Hall to Assist

Word coming from Pastor H. S. Early advises that Mrs. Early, who has been very sick for some time with typhoid, was still not well and that he could not be with Bro. French who is to hold the meeting at the Christian Church. Elder H. F. Hall, a former pastor of this church is expected to be present and help Bro. French in the meeting.

of that education, it becomes a matter of simple arithmetic so far as a safe and profitable industry is concerned.

In connection with profits, it might be well to state here that about two gallons of casing head gasoline can be recovered from each thousand feet of non-condensable Gas, which means eight gallons to the ton of Shale.

Just multiply these figures by the 7500 tons that a full sized plant will handle in a day and Clay City will not miss its former lumber business very badly.

In order that we may realize the absolute certainty of these operations, we will in our next article take up the Shale industry of Scotland for a Shale identical with the Kentucky Deposit has been successfully and profitably treated there since 1847 and under conditions not nearly so favorable to success as exists here at Clay City.

(To be continued.)

A BUSINESS BANK

The business man's bank, if its service is to satisfy, must know the needs and the opportunities of that business, and must be willing and able to serve them.

Officers and directors of this bank are not only experienced bankers but also competent business executives. Their ideal is satisfying, constructive service to their community, and the bank's equipment, its connections, and its strength are such as to make this possible.

Experienced, conservative management, ample resources, complete facilities, and FEDERAL RESERVE MEMBERSHIP are the substantial foundations on which it builds for its customers, its community and itself.

Notice to the Voters

Of Powell County

I take this method of informing the voters of Powell county that I am running as a Deputy to Elbert Faulkner for Tax Commissioner, inasmuch as he has given me the job of making out the tax books in case he is elected. Under no circumstance would I run as a Deputy to any one, except that I have fatherless children to raise and care for. For this reason alone I am asking my friends to support "Faulkner" for "Assessor."

It has been rumored that I have withdrawn as Mr. Faulkner's Deputy but I have determined to run, and this is final.

Appreciating anything you may do or say for me, I am, Gratefully yours,

Mrs. Edna Frazier.

THE "OLD RELIABLE" THEDFORD'S BLACK-DRAUGHT

White Haired Alabama Lady Says She Has Seen Medicines Come and Go But The "Old Reliable" Thedford's Black-Draught Came and Stayed.

Dutton, Ala.—In recommending Thedford's Black-Draught to her friends and neighbors here, Mrs. T. F. Parks, a well-known Jackson County lady, said: "I am getting up in years; my head is pretty white. I have seen medicines and remedies come and go but the old reliable came and stayed. I am talking of Black-Draught, a liver medicine we have used for years—one that can be depended upon and one that will do the work."

"Black-Draught will relieve indigestion and constipation if taken right, and I know for I tried it. It is the best thing I have ever found for the full, uncomfortable

feeling after meals. Sour stomach and sick headache can be relieved by taking Black-Draught. It aids digestion, also assists the liver in throwing off impurities. I am glad to recommend Black-Draught, and do, to my friends and neighbors."

Thedford's Black-Draught is a standard household remedy with a record of over seventy years of successful use. Every one occasionally needs something to help cleanse the system of impurities. Try Black-Draught. Insist upon Thedford's, the genuine.
